NEW for **Hannay Reels** **BOLT-ON ACCESSORIES**

"BOLT-ON" ERGONOMIC & SAFETY FEATURES FOR HANNAY REELS

Easily eliminate competition & add value to your next Reel Sale

Choose from a range of exclusive bolt-on technologies:

EZI-DEPLOY™

Auto Declutching System

No levers, buttons, or electronics required. Just pull and go! Fully automatic "Drag-free" payout with the lowest resistance, EZI-DEPLOY™ clutch systems offers smooth reel operation to minimise operator strain injuries and reduce excessive force that can prematurely damage equipment. Critical for longer hose lengths and larger 1", 1½" and 2" hoses.

FlatWinder™

Automatic Hose Layering Technology

Readily adapted to any Hannay Reel for efficient easy layering of hose during storage. Minimise injuries, reduce hose damage and increase productivity.

FLAT WINDER

Reel-In-Control™

Wireless Remote Control

Cut response times and increase safety with frequency hopping technology. This feature allows for safer single user operation and increased productivity.

Safe-R-Reel™

Rewind Speed Control

Reel Tech's patented Safe-R-Reel™ easy bolt-on brake cassette is designed for Hannay Spring Reels, ensures a controlled speed during rewind. Minimise injuries and hose damage.

Safe-R-Reel™

Follow Me Hose Guide

Swivelling Hose Guide For Flatwinder Systems

Market's first multi directional swivelling hose guide allows flexible use at any angle. A safer hose handling solution that reduces hose jam and damage.
